# Parallel And Distributed Map Merging And Localization: Algorithms, Tools And Strategies For Robotic Networks (SpringerBriefs In Computer Science)

## Synopsis

This work examines the challenges of distributed map merging and localization in multi-robot systems, which enables robots to acquire the knowledge of their surroundings needed to carry out coordinated tasks. After identifying the main issues associated with this problem, each chapter introduces a different distributed strategy for solving them. In addition to presenting a review of distributed algorithms for perception in localization and map merging, the text also provides the reader with the necessary tools for proposing new solutions to problems of multi-robot perception, as well as other interesting topics related to multi-robot scenarios. The coverage is largely self-contained, supported by numerous explanations and demonstrations, although references for further study are also supplied. The reader will not require any prior background knowledge, other than a basic understanding of mathematics at a graduate-student level.

## Book Information

Series: SpringerBriefs in Computer Science

Paperback: 116 pages

Publisher: Springer; 1st ed. 2015 edition (November 28, 2015)

Language: English

ISBN-10: 3319258842

ISBN-13: 978-3319258843

Product Dimensions: 6.1 x 0.3 x 9.2 inches

Shipping Weight: 7 ounces (View shipping rates and policies)

Average Customer Review: Be the first to review this item

Best Sellers Rank: #6,625,007 in Books (See Top 100 in Books) #46 in Books > Computers & Technology > Programming > Software Design, Testing & Engineering > Localization #1462 in Books > Computers & Technology > Hardware & DIY > Internet & Networking #2761 in Books > Computers & Technology > Computer Science > Robotics
